

JAYANTH C

+91-8088912064 | jayanthjayanthc96@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [HackerRank](#)

Software Engineer (MCA 2026) with hands-on experience building production-grade backend services and full-stack systems across Java, Python, and JavaScript. Solved **150+ DSA problems across LeetCode and HackerRank**, with experience in designing REST APIs, scalable backend systems, and AI-powered applications. Seeking a Software Development Engineer role.

EDUCATION

Bangalore Institute of Technology

Master of Computer Applications (MCA) – CGPA: 8.84 / 10

VET First Grade College

Bachelor of Computer Applications (BCA) – CGPA: 8.83 / 10

Bengaluru, Karnataka

2024 – June 2026

Bengaluru, Karnataka

2021 – 2024

TECHNICAL SKILLS

Languages: Java (8/11/17), TypeScript, JavaScript, Python, C

Backend: Spring Boot, Spring Data JPA, Hibernate, NestJS, Express.js, Microservices Architecture, REST API design

Frontend & Auth: React.js, Tailwind CSS, HTML5, CSS3, JWT, RBAC

Databases: MySQL, PostgreSQL, MongoDB, Redis

Tools & Methodologies: Maven, Git, GitHub, Docker, Agile/Scrum

Testing & Fundamentals: JUnit, Mockito, Jest, OOPs, DBMS, Computer Networks

AI & ML: Google Gemini API, Groq API, Scikit-learn, TensorFlow, Pandas, NumPy

EXPERIENCE

CampusPe

Full Stack Development Intern (Java)

Remote

Feb 2026 – May 2026

- Engineered a production-grade **DPDP Act** compliance platform using **Java Spring Boot, Spring Data JPA, and MySQL** for robust backend data persistence, integrated with a dynamic **React.js** frontend; independently owning and delivering all three tiers ahead of schedule.
- Designed normalized relational database schemas, built **JWT-secured RESTful API** endpoints, and implemented repository patterns to ensure optimal application reliability and security.
- Followed **Agile methodologies**, managing **version control** via Git/GitHub, and utilized **Maven** for seamless dependency management and build automation.

AISECT Pvt. Ltd

Data Science / ML Intern

Bengaluru

Nov 2023 – Mar 2024

- Built data preprocessing pipelines in Python (Pandas, NumPy); evaluated classification model performance (accuracy, precision, recall, F1) and wrote clean, documented code following software development best practices.

PROJECTS

Smart HR Compliance System [GitHub] Docker

Java 17, Spring Boot, Spring Security, Groq API, React, PostgreSQL,

- Developed a **multi-tenant HR compliance platform** with **12+ secure REST APIs**, **JWT-based RBAC**, and role-specific dashboards for Admin, HR, and Employee using **Java 17, Spring Boot, Spring Security, React, and PostgreSQL**.
- Integrated **Groq API with a RAG pipeline** for an AI assistant answering HR policy queries from **PostgreSQL-persisted document chunks**; designed a **rule-based compliance engine** using **Spring Data JPA** to automate policy validation, compliance monitoring, and audit logging.

Real-time Stock Screener [GitHub]

React, Java, Spring Boot, WebSockets, Redis Pub/Sub, PostgreSQL

- Designed and developed a real-time stock screening platform using Spring Boot, Redis Pub/Sub, WebSockets, React, and PostgreSQL to analyze **500+ stocks** against **3 configurable screening indicators** (P/E ratio, RSI, and trading volume) through **10+ REST APIs**.
- Built an event-driven alert engine enabling users to configure personalized stock alerts, with **PostgreSQL-backed rule management**, **5-second configurable** market refresh intervals, and instant notifications delivered via **Redis Pub/Sub** and **WebSockets**.

HiredLens [GitHub] [Live]

NestJS, React, TypeScript, PostgreSQL, Prisma ORM, Google Gemini API, Docker

- Designed modular data models, robust API contracts, and integration points for a NestJS/Prisma (PostgreSQL)/React monorepo using **TypeScript** for end-to-end type safety, with **JWT-secured REST APIs** deployed via Docker on Render.
- Integrated Google Gemini API for a semantic resume analyzer generating **90-day** learning roadmaps; implemented unit and integration tests using **Jest** to validate backend business logic and ensure application stability.

ACHIEVEMENTS & EXTRACURRICULARS

Research Paper Published – “NeuroSymbolic AI System”, IJARCCCE Vol. 15, Issue 1, Jan 2026 (IF: 8.471, DOI: 10.17148/IJARCCCE.2026.15110); appreciated by faculty and external examiner at BIT.

MoE Hackathon – Built GrievanceGPT (n8n, Gemini API) for automated college grievance routing in under 3 hours. [GitHub]

Technical Seminar – Reviewed REPLUG, Self-RAG, HippoRAG, RAG-Fusion, FLARE, and GraphRAG for RAG-based Knowledge-Intensive QA systems.
